

CYAN DESIGN PERMANENT SHOWROOM

High Point, NC

Project Year 2014

Glazier: Furniture City Glass - High Point, NC

Cyan Design is a Texas-based home decor company with a philosophy of eclectic elegance coupled with compelling value in their 1,550 sq ft permanent showroom located in the IHFC building of High Point Market.

The installation of "True White" Dreamwalls Color Glass backpainted glass around the winding exterior hallways of the space involved nearly 2 full days of careful measuring and marking with laser levels by Furniture City Glass of High Point to ensure a precise installation for the grid-like design.

Fabrication for TV monitors, sconces, column wraps, and 3 locations of sandblasted backlit logos were all carefully specified and fabricated at Gardner Glass Products' NC location.

The final result involved three installation phases with a consistency of color that matched tighter than the usual 1 delta spectro photometer reading for the over 1,800 square feet of glass that was produced for this impressive project.

NOTE: Photography of backlighting elements do not do them justice.
